

Connecting Victoria

Creating more jobs, boosting local businesses and connecting more Victorians to loved ones

The Victorian Government is fast-tracking better mobile coverage and broadband across the state through the \$550 million *Connecting Victoria* program.

It's never been more important to be connected – for family, community, work and safety. That's why we are asking Victorians to help identify where mobile and broadband improvements are most needed.

New mobile and broadband infrastructure will mean more jobs and a boost for local businesses and will help Victorians stay connected to loved ones.

It will give more Victorians the opportunity to participate in the online world, with better mobile coverage at home and when out and about.

The first locations to receive upgrades or new infrastructure are expected to be announced later this year, with more to follow across the state.

TELL US ABOUT MOBILE AND BROADBAND CONNECTIVITY

Help us identify where mobile and broadband improvements are most needed across the state.

Use our interactive map to pinpoint where you are experiencing a problem with mobile coverage or internet. You will also be asked to describe your problem.
